Triple+ CLM™

ACOUSTIC
SENSOR

CO and Smoke detectors are among the most important safety devices in your home, but not if you aren't home to hear them. Add the Triple+ CLM™ Acoustic Sensor to your existing CO and Smoke alarms and be notified if a smoke or CO alarm sounds.

Smart CO and Smoke sensors are mandatory for your home protection and are available in varying forms and price range. By adding the Triple+ CLM™ Acoustic Sensor you can continue using your existing CO and Smoke alarms and be notified on the Triple+ app if a smoke or CO alarm sounds.

The Triple+ CLM™ Acoustic Sensor is a wireless device, connected to the Triple+ CLM™ HUB with its free Triple+ APP. You can choose whether you receive the smoke or CO alarm alert as a push notification, email, text message, phone call or a combination of them. Wherever you are, the Triple+ CLM™ Acoustic Sensor does not allow you to miss an alarm.

The Triple+ CLM™ Acoustic Sensor is a natural extension of your Triple+ CLM™ Water Leak Damage Prevention system. With only a minor additional expense and no infrastructure changes, your property and loved ones are well protected against the worst possible damages any home faces.

Triple+ CLM™

**ACOUSTIC
SENSOR**

**Supports any certified CO
and Smoke Sensors**

Wireless Communication

Easy to use Smartphone APP

Battery Operated

Technical data

 Power supply: 2x AAA non-rechargeable batteries	 Dimensions: 1.2" x 3.8" x 1.1"
 Battery life span: up to two years	 Weight: 2.64 oz
 Wireless: 868/915 MHz	 Operating voltage: 3V
 Operating temperature: -4 -122° F	 Wirelessly communicates with the Triple + CLM™ HUB

About Us

Triple+ is an innovative and leading manufacturer and marketer of products and services within the IoT (Internet of Things) arena. Triple+ offers ground-breaking solutions for water leak damage prevention in small to large-scale properties.

OUR GOAL To protect the property of our residential, commercial and property management customers, as well as prevent costly water leak damages, increase operational efficiency and improve personal safety.

Wear and tear, frozen pipes, overflow and careless water usage in residential and office buildings, smart irrigation and water leak prevention, are the main causes of water damage. Billions are spent annually in fixing damages caused by water leaks and the tremendous waste of water is something we can't afford to happen as droughts occur more frequently. Damp conditions also breed mold spores which are a health hazard.

WHAT WE SOLVE

OUR MARKET-PROVEN SOLUTIONS & SERVICES

The **Triple+** line of products is based on proprietary technologies. This includes battery operated, wireless water leak sensors, repeaters, irrigation controllers, hubs and shutoff units that enable the automated control of water. The **Triple+** Central Monitoring Station is the only service of its kind in the market to protect an unlimited number of systems from a single dashboard.

OUR PARTNERS Leading insurance and property management companies, plumbing firms and HVAC contractors have already partnered with **Triple+** to reduce the number of incidents and high cost of water leak damage.

Triple+ end-to-end services are available worldwide and the company holds offices in the USA, Canada, Russia and Israel.
