Triple+ CLM™

IRRIGATION CONTROLLER

The Triple+ CLM™ Irrigation Controller is a revolutionary smart sprinkler and drip control system for homes and high-rise buildings. This wireless and easy-to-install device complements the most advanced Triple+ Water Leak Damage Prevention system. It can toggle your in-ground sprinklers and drip systems from anywhere, using your phone either automatically or manually. It offers a completely new dimension in conserving water as it features built in cloud-based Weather Intelligence technology. Whenever it is about to rain or the wind picks up, the sprinkler cycle will automatically be skipped and water saved. Moreover, the Triple+ CLM™ Irrigation Controller supports the Triple+ Water Flow Sensor and includes sophisticated Adaptive Learning technology. This will assure that any abnormal water consumption caused by a pipe burst or fault in the sprinkler system will automatically be detected and excessive use of water prevented. There is no sense to water your garden in all seasons with the same intensity. Triple+ CLM™ Irrigation Controller knows this and will let you define your garden's watering schedule according to the season. All this done with ease from your mobile phone.

REAL-TIME WATERING

QUICK & EASY INSTALLATION

APP WITH SMARTEST

6 IRRIGATION CHANNELS

SCHEDULE TAILORED SETUP

WATER-SAVING CLOUD-BASED

The Green Smart Solution

Triple+

Detect • Connect • Protect

- Easy to use smartphone app
- Six irrigation zones per controller (in total 24 zones per hub)
- Wireless communication
Supports Water Flow Sensor
- Adaptive Learning algorithms to detect abnormal water consumption
- Multiple settings of irrigation cycles per day of the week and time of day
- Connection to cloud-based weather channel to avoid watering during rainy or windy days
- Automatic seasonal adjustments to avoid water wastage during colder seasons
- Ability to manage an unlimited number of locations through a map-based Central Monitoring dashboard

Technical data	
	Dimensions: 13"x13"x3"
	Weight: 7 oz
	Operating voltage: 24VAC
	Wirelessly communicates with the Triple + CLM™ HUB

The Green Smart Solution

About Us

Triple+ is an innovative and leading manufacturer and marketer of products and services within the IoT (Internet of Things) arena. Triple+ offers ground-breaking solutions for water leak damage prevention in small to large-scale properties.

OUR GOAL To protect the property of our residential, commercial and property management customers, as well as prevent costly water leak damages, increase operational efficiency and improve personal safety.

Wear and tear, frozen pipes, overflow and careless water usage in residential and office buildings, smart irrigation and water leak prevention, are the main causes of water damage. Billions are spent annually in fixing damages caused by water leaks and the tremendous waste of water is something we can't afford to happen as droughts occur more frequently. Damp conditions also breed mold spores which are a health hazard.

WHAT WE SOLVE

OUR MARKET-PROVEN SOLUTIONS & SERVICES

The **Triple+** line of products is based on proprietary technologies. This includes battery operated, wireless water leak sensors, repeaters, irrigation controllers, hubs and shutoff units that enable the automated control of water. The **Triple+** Central Monitoring Station is the only service of its kind in the market to protect an unlimited number of systems from a single dashboard.

OUR PARTNERS Leading insurance and property management companies, plumbing firms and HVAC contractors have already partnered with **Triple+** to reduce the number of incidents and high cost of water leak damage.

Triple+ end-to-end services are available worldwide and the company holds offices in the USA, Canada, Russia and Israel.
